Shareholding Structure

Company Summary

Solo Enerji Yatırım Sanayi ve Ticaret Anonim Şirketi, one of the companies in A.I.S group, is one of the energy investment instruments of the Group that started its commercial life in 2012. The main partner of the Company is Buhar Enerji, one of the leading companies of the sector which owns exploration and operation licenses in order to be able to generate electricity and heat from geothermal and solar energy and to use this energy in various fields of life. The Company's main area of activity is to produce renewable, clean, environmentally friendly electricity from wind and solar energy.

In 2013, the company applied to EMRA for Electricity Generation License for the production of electricity from solar energy within the boundaries of Isparta Province, Yalvaç District, Dedeçam premises and participated in the tender done in this process by bidding for 20 MW, but the license was not granted.

Technical feasibility and connection studies are carried out on the land of 217,817 m2 owned by our property group located in the Tire District of İzmir Province, which is suitable for unlicensed solar energy investment in the area, and applications will be made at the best possible time to obtain permission to generate electricity from solar energy.

The company started wind measurements for the 29.7 MWe- installed capacity wind power plant project planned to be built in Bolu Province, Göynük, Bulanık region on 15.09.2015. The wind measurement report was approved by the General Directorate of Meteorology on 06.12.2016. The Company has completed all preparations to make an application for a 29.7 MWe wind power plant production license to EMRA and is waiting for TEIAS for a tender to be made for the region concerned. We anticipate that the total investment cost (today's values) of this project, expected to be tendered in 2021-22 for the establishment and installation of the related plant, will be approximately US \$45 million. On the other hand, given the wind efficiency of the land, we expect this project to generate an annual turnover of around \$4.5 million.

The company has a direct subsidiary within BE Enerji Anonim Şirketi.

The company's total assets shown in its Balance sheet are at the level of 1.349.000 TL as of the end of 2017.

Our Vision

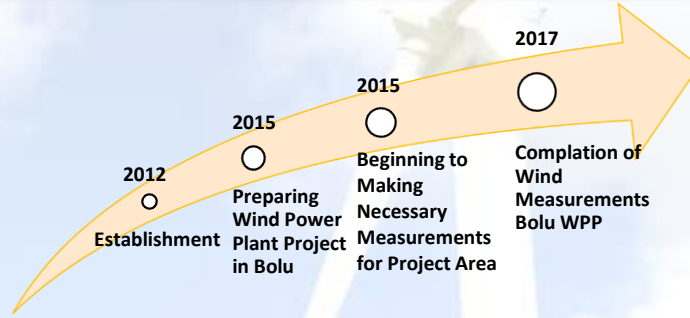

Solo Enerji has been continuing it works on renewable energy since 2012. The Company wants to contribute sustainable development of the country with its projects and investments.
